The "Catalogue" feature provides a comprehensive view of all books in the system, this allows administrators to keep track of the library's inventory and manage the borrowing process with ease.

Issue Book/Return Book

The issue book and return book features in the app allow for efficient and secure management of library resources. An administrator can issue books to students by entering the ISBN, student ID, issue date, and due date. Likewise, an administrator can return books by entering the ISBN and student ID. This ensures that the book borrowing process is streamlined and all books are accounted for, making it easier for the administrator to keep track of the library's resources.
